

Overband Crack Seal

Overband Crack Seal is one of the most economical pavement maintenance tools for asphalt and concrete pavements.

The combination of asphalt cement and fibers produce a strong yet flexible seal that bonds well to crack walls. This process is the key to keeping water out of the pavement subbase which in turn will help provide long pavement service life.

Features

- Excellent ductility in cold temperatures
- Superior tensile strength supports heavy traffic loading
- Applied under pressure to totally fill and seal distress
- Excellent seal integrity yielding longer service life

Benefits

- Delays and minimizes reflective cracking
- Extends overall pavement service life
- One of the most economical pavement repair process
- Consistent quality application with high production

Applications

- Highways
- Streets and Roadways
- State and Metro Parks
- Airport Runways and Taxiways
- Parking Lots
- Asphalt and Concrete Pavements

Common Uses

- Random cracking
- Transverse cracking
- Longitudinal cracking
- Reflective cracking
- Concrete construction joints
